

A COMMERCIAL SERIES 50 Hz

Air Handler

7½ and 10 Ton

Nominal Capacity: 90,000 to 120,000 BTUH [26.40 kW to 35.30 kW]

The A Commercial series air handler is designed for upflow or horizontal application for indoor use only.

Standard Features

- Thermal expansion valve (1) A90, (2) A120
- Dual circuitry on A120 for use with a 10-ton unit or two 5-ton condensing units
- Built-in horizontal and vertical oversized condensate pan to ensure proper drainage
- Cabinet is fully insulated with blankets of fiberglass
- Built-in filter rack
- Low-voltage and high-voltage entry on front panel
- Transformer, blower relay and interlock relay are standard on every unit
- Copper tube, aluminum fin coil
- Belt-driven, low-noise, draw-thru centrifugal blower for quiet, efficient operation

Third-Party Tested

 Independent third-party performance tested with matching outdoor sections by ETL Testing Laboratories, Inc., per ARI Standard 210-240

Cabinet Construction

- Heavy-gauge, G-90 galvanized steel with removable access panels; properly reinforced and braced
- Insulation is supplied in sufficient thickness (1") and density to prevent condensate from forming on the unit casing
- Weather-resistant, baked-on powder epoxy paint finish with 500-hour salt spray approval

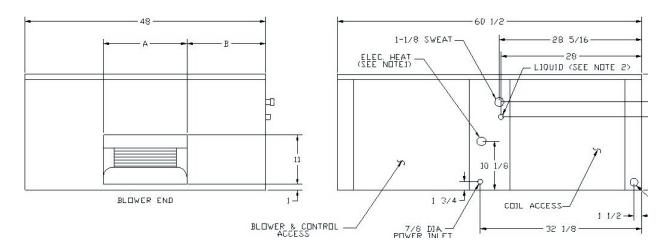

Accessories

• To be used with Room Thermostat (CHT90-120)

Any adjustment made to the blower should not cause the motor to draw more than the motors rated RLA. Applications that exceed the above could require a larger motor.

Quality Makes the Difference!

All of our systems are designed and manufactured with the same high-quality standards, regardless of size or efficiency. We have designed these units to significantly reduce the most frequent causes of product failure. They are simple to service and forgiving to operate. We use quality materials and components. Finally, every unit is run-tested before it leaves the factory. That's why we know...there's no better quality.
